

1) Create a BST using the following values,
100, 96, 110, 98, 95, 120, 109, 113, 130, 83

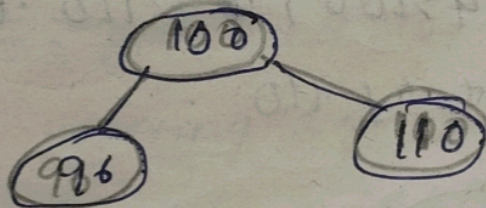

→ The very first value is 100. Hence it ~~does~~
~~are~~ become the first parent node
which is called rootNode.

(100)

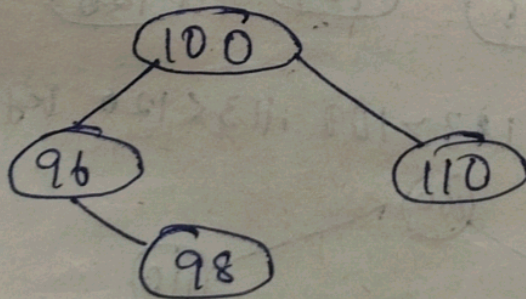

2) next value is 96. since 96 is [<] greater
than 100. it is inserted left of 100

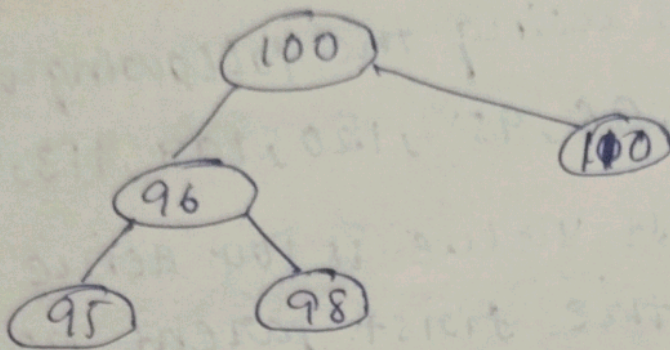

3) insert 110, ~~100~~ 110 > 100. Hence 110 is inserted
right of 100

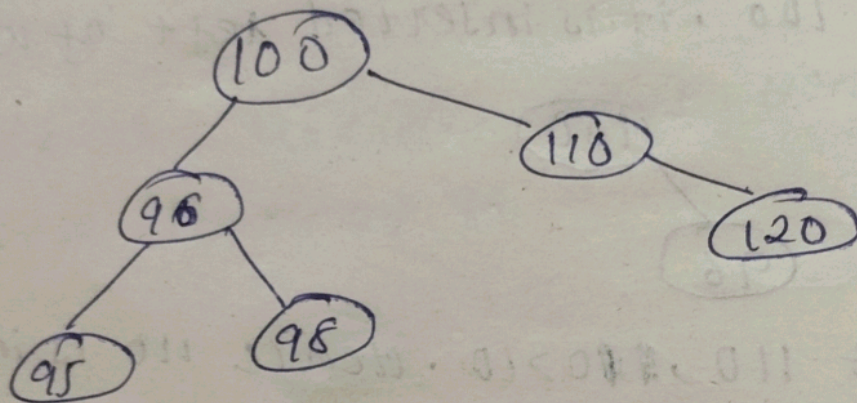

4) insert 98 < 100, 98 > 96. Hence 98 is insert
-ed right of 96

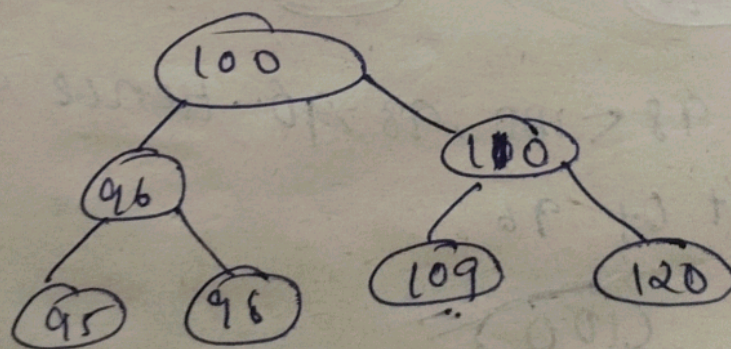

5) insert 95 < 100, 95 < 96, 95 < 98. Hence
95 is inserted left of 96.

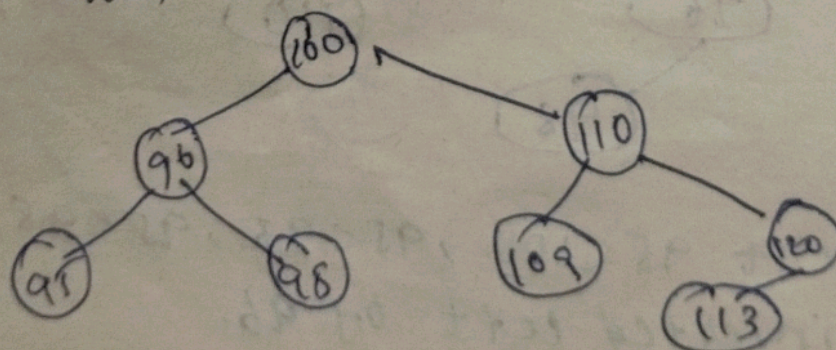

6) insert 120, $120 > 100$, $120 > 110$. Hence 120 is inserted right of 110.

7) insert 109, $109 > 100$, $109 < 110$. Hence 109 is inserted left of 110.

8) insert 113, $113 > 100$, $113 < 120$ left of 120

9) $83 < 100$, $83 < 96$, $83 < 95$, left of 95
